THE CHURCHES OF THE MIDDLE AGES.
By HENRY BOWMAN and JOSEPH S. CROWTHER,
Architects, Manchester.

To be completed in Twenty Parts, each containing six plates imperial folio. Issued at intervals of two months. Price per part to subscribers—proofs, large paper, 10s. 6d.; tinted, small paper, 8s.; plain, 7s. 6d. Parts I. to IX. are now published, and contain illustrations of Ewerby Church, Lincolnshire; Temple Balsall Chapel, Warwickshire; Heckington Church, Lincolnshire; Cley Church, Norfolk; and Threekingham Church, Lincolnshire.

"Ewerby is a magnificent specimen of a flowing middle-pointed church. It is most perfectly measured and described; one can follow the most recondite beauties of the construction, mouldings, and joints in these plates, almost as well as in the original structure. Such a monograph as this will be of incalculable value to the architects of our Colonies or the United States, who have no means of access to ancient churches. The plates are on stone, done with remarkable skill and distinctness. Of Heckington we can only say that the perspective view from the south-east presents a very vision of beauty; we can hardly conceive anything more perfect. We heartily recommend this series to all who are able to patronize it."—Ecclesiologist, Oct. 1849.

PAPER-HANGINGS.—COTTERELL BROTHERS, No. 500, New Oxford-street, London, invite the attention of Architects and Builders to their superior and important collection of FRENCH and ENGLISH PAPER-HANGINGS. The stock, which is very extensive, embraces every description of paper-hangings, from the simplest to the most finished in use, and will be found to display design and harmonious colouring well adapted to the improving taste of the public, and at prices quite in accordance with the economical spirit of the times. The specimens of panel designs, or decorations for walls and ceilings, are well worth the inspection of persons of taste; by a novel arrangement they are fixed so that the finished effect of a room may be seen at a glance; strict attention is paid to architectural propriety and harmonious combinations of form and colour, often so lamentably deficient in this class of decoration. The show-rooms are constantly open to visitors, at 500, New Oxford-street, London; and in the west of England, at Bristol and Bath.
